

Bayesian Econometrics

Organisational details

Gertraud Malsiner-Walli

Summer term 2026

Course design

- ▶ The focus of the course lies on a mix between lectures, case studies and students' presentations and a written exam:
 - ▶ Lectures
 - ▶ Home assignments
 - ▶ Student presentations
 - ▶ Exam

Grading

The grading is based on the following components:

- ▶ Assignments (40p)
- ▶ Presentations (40p)
- ▶ Final exam (20p)

Grade	Points
(1) <i>very good/sehr gut</i>	90-100
(2) <i>good/gut</i>	80-89.99
(3) <i>satisfactory/befriedigend</i>	70-79.99
(4) <i>sufficient/genügend</i>	60-69.99

Deliverables: Assignments and Exam

- ▶ *Assignments:*
 - ▶ due **12.3.**
 - ▶ due **19.3.**
 - ▶ due **26.3**
 - ▶ due **09.4.**
- ▶ *Final exam:* **23.4.**
 - ▶ The final exam is a closed book, written (pen & paper) exam.

Deliverables: Paper presentations

- ▶ Teams of two students will present a paper about a Bayesian approach autonomously.
- ▶ Deliverables:
 - ▶ First presentation: **26.3.** (Presentation of the paper)
 - ▶ Second presentation: **16.4** (Application of the presented method to a data set)

Schedule

- ▶ **05.3.** Bayes inference, Conjugate analysis, Normal model, MC method
- ▶ **12.3.** HW 1, Regression, Data Augmentation, Inefficiency factor, MH sampling
- ▶ **19.3.** HW 2, Model selection, Marginal likelihood, Bayes factor, Predictive Analysis, Variable selection, Shrinkage priors
- ▶ **26.3.** HW 3, Student presentations I
- ▶ **09.4.** HW 4, SV model
- ▶ **16.3.** Student presentations II
- ▶ **23.3.** Exam
